(Verse 1)

Something undoes me well

Just ask me, and I will tell

So learn them all to excel

So nothing's in your way

Inverses all do the trick

They undo work like magic

I know you're looking for this

So they're not in your way

(Pre Chorus)

Multiply, divide

Square root, square both sides

Add right, or use subtraction

Just make sure your work is showing!

(Chorus)

Hey, operations

They might be crazy

But use an inverse,

And solve me, maybe?

It's hard to solve right,

Without you baby,

But use an inverse,

And solve me, maybe?

Hey, operations

They might be crazy

But use an inverse,
And solve me, maybe?

And all the other kids,
They try to solve me,
But use an inverse,
And solve me, maybe?

(Verse 2)
You don't know where you should start
You don't know how or which part
I'll tell you what would be smart
Just try an inverse

Start outside and then work in
Variable is at the end
I knew it that you would win
By using an inverse

(PreChorus)
Multiply, divide
Square root, square both sides
Add right, or use subtraction
Just make sure your work is showing!

(Chorus)
Hey, operations
They might be crazy
But use an inverse,
And solve me, maybe?

It's hard to solve right,
Without you baby,
But use an inverse,
And solve me, maybe?

Hey, operations
They might be crazy
But use an inverse,
And solve me, maybe?

And all the other kids,
They try to solve me,
But use an inverse,
And solve me, maybe?

Before you came into my life,
I need it solved bad
I need it solved bad
I need it solved so bad

Before you came into my life
I need it solved bad
I need it solved bad
I need it solved so bad

It's hard to solve right,
Without you baby,
But use an inverse,
And solve me, maybe?

Hey, operations
They might be crazy
But use an inverse,
And solve me, maybe?

And all the other kids,
They try to solve me,
But use an inverse,
And solve me, maybe?

Before you came into my life
I needed solved bad
I needed solved bad
I needed solved so bad

Before you came into my life
I need it solved bad
And you should know that
So solve me maybe?
